PROFESSIONAL SUMMARY

Software Engineer with 4.5+ years of experience designing and delivering scalable, high-performance applications solutions. Skilled in system optimization, workflow automation, full-stack development, and cross-functional team collaboration. Experienced in building platforms that improve efficiency, engagement, and user experience.

SKILLS SUMMARY

- **Languages:** TypeScript, JavaScript, Python, SQL, Bash, OOP
- **Frontend:** Next.js, React.js, Redux Toolkit, Zustand, Tailwind CSS, TanStack Query, Shadcn UI, Framer Motion
- **Backend:** Node.js, Express.js, FastAPI, PostgreSQL, MongoDB, REST APIs, JWT/Auth, Redis
- **Tools & AI:** Docker, AWS, CI/CD, SonarQube, OpenTelemetry, Trivy, OWASP, Cursor, Claude, Web3.js, GenAI, OpenAI API, LLM Integration, AI SDKs, MCP.

EXPERIENCE

- **Jasper Colin** Onsite, Gurgaon, India
Frontend Engineer (Full-time) May 2025 – Present
 - Developed **enterprise grade UI** for multiple research studies in the **Top Brass** platform using **Next.js**.
 - Spearheaded the **redesign of the client portal**, transforming **multiple user journeys**, modernizing the **UI across four study workflows**, and delivering **AI-powered capabilities** and **new product features** within an aggressive **3-month deadline**, improving **platform usability** and **workflow efficiency**.
 - Coordinated and led frontend development across the **Audience, Expert, Vendor, and Admin portals**, implementing redesigned user flows, modern UI, and new features while ensuring seamless integration with the Client Portal and successful delivery to the **UAT environment**.
 - Led integration of **frontend code across multiple vendors** for studies, reviewing and merging feature-specific contributions into the main repository and stabilizing the **SIT environment** for testing and release.
 - Built a custom **OpenTelemetry (OTEL)** package, integrating **Grafana** and **Jaeger** to enable centralized frontend **logging, metrics, and distributed tracing** across all Top Brass services.
 - Built **Operations Tool**, an **outreach platform** for **Admins** and **Research Associates (RA)**, using **Next.js**, with dashboards, RA workflows, dialer and Teams integrations, video consent management, and role-based access control.
 - Implemented **scalable APIs** with **Node.js**, **Express**, and **MongoDB** for efficient frontend-backend communication, incorporating **encryption**, **data masking**, and **audit logging** to ensure **data security** and compliance.
- **Hashtrust Technologies** Hybrid, Gurgaon, India
Software Engineer (Full-time) July 2022 – April 2025
 - **Fetch.ai**
 - * Developed high-quality, reusable front-end code using **Next.js** and **Nextra**. Engineered modern, responsive **Fetch.ai** and **Fetch.ai documentation** website.
 - * Developed backend code with **FastAPI** and **PostgreSQL**, enhancing documentation content and boosting user engagement through data insights.
 - * Developed the **AS11.ai** platform, integrated the **ASI LLM**, and developed the full conversational AI application.
 - * Migrated APIs of **Fetch.ai documentation** from **client-side to server-side**, improving speed by **30%**.
 - * Integrated various external systems within the **uAgents** framework. Created integration examples and documentation to guide its use with different tools.
 - * Developed the **Fetch.ai Integrations** platform, utilizing the **GitHub API** to dynamically retrieve and display integration data. Optimized backend data handling and frontend responsiveness, meeting tight project deadlines efficiently.
 - **Globacap**
 - * Developed frontend code using **React.js**, for **Globacap**, ensuring **responsiveness**, and created reusable components with **styled-components** for consistent and efficient UI development.
 - * Collaborated closely with the **UI/UX** team to deliver pixel-perfect websites based on Figma designs
 - * Integrated complex **APIs** and managed state using **Redux-Saga** for efficient and scalable data flow.
 - **Connect Wallet**
 - * Developed a fully functional **Web3 based payment gateway** integrating wallets such as **MetaMask**, **TronLink**, and **Trust Wallet**.
 - * Enabled secure token transfers and blockchain transactions across multiple networks.
- **Celebal Technologies** Remote, Jaipur, India
Associate Software Developer (Internship) Aug 2021 – Mar 2022
 - Developed and maintained chatbot applications using **Node.js** and the **Microsoft Bot Framework**.
 - Designed and implemented conversational flows for the **BPA Cognitive Search** using the **Microsoft Bot Framework**, developed **REST APIs** with Node.js and Express.js, and created **Adaptive Cards** tailored to client specifications.

EDUCATION

- **Guru Nanak Dev Engineering College** Ludhiana, Punjab
Bachelor of Technology in Electronics and Communication Engineering; GPA: 7.4 July 2017 – July 2021
